DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4-6 are finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3, the only independent claim, is to a "clamping tool", however claims 4-6 are to upper and lower jaws per se, thus it appears that these claims are not drawn to the same invention as that of claim 3, from which they depend.

Claim 4 contains only function without sufficient structure to accomplish the claimed function.

It is unclear as to what applicant is claiming in claim 5 as the phrase "conversed angularly" is ambiguous and indefinite.

Claim 6 appears to depend from two claims, 5 and 3, but is not a multiple dependent claim in the proper format, nor was an additional fee for a multiple dependent claim submitted, thus it is unclear as to what applicant's intent with respect to this claim is. Also, the claim refers to a drawing figure as part of the claimed limitation which is improper.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3723

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 3 is finally rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Kalkbrenner et. al. or Tabbert.

Response to Arguments

5. Applicant's arguments with respect to claims 3-6 have been considered but are moot in view of the new ground(s) of rejection.

The newly present claims, claims 4-6, are ambiguous and indefinite and therefore are clearly unpatentable. A rejection on prior art cannot be applied at this time.

New claim 3 is still readable on the cited prior patents as was original claims 1 and 2.

Conclusion

6. This action is a **final rejection** and is intended to close the prosecution of this application. Applicant's reply under 37 CFR 1.113 to this action is limited either to an appeal to the Board of Patent Appeals and Interferences or to an amendment complying with the requirements set forth below.

If applicant should desire to appeal any rejection made by the examiner, a Notice of Appeal must be filed within the period for reply identifying the rejected claim or claims appealed. The Notice of Appeal must be accompanied by the required appeal fee of \$170.00.

If applicant should desire to file an amendment, entry of a proposed amendment after final rejection cannot be made as a matter of right unless it merely cancels claims or complies with a formal requirement made earlier. Amendments touching the merits of the application which otherwise might not be proper may be admitted upon a showing a good and sufficient reasons why they are necessary and why they were not presented earlier.

A reply under 37 CFR 1.113 to a final rejection must include the appeal from, or cancellation of, each rejected claim. The filing of an amendment after final rejection, whether or not it is entered, does not stop the running of the statutory period for reply to the final rejection unless the examiner holds the claims to be in condition for allowance. Accordingly, if a Notice of Appeal has not been filed properly within the period for reply, or any extension of this period obtained under either 37 CFR 1.136(a) or (b), the application will become abandoned.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James G. Smith whose telephone number is 571-272-4496. The examiner can normally be reached on M-Th (7:05- 4:35) Fri. off.
